PROFESSIONAL SUMMARY

Full-stack JavaScript developer with 4+ years of production experience in a small, fast-moving product team, fully remote for the first two years. Builds and maintains client-facing applications end to end: backend logic and REST APIs in MeteorJS and Node.js, MongoDB data layers, Stripe and Chargebee billing integrations, calendar workflows, and Cypress end-to-end test coverage. Designed, shipped, and maintains a source-available Electron desktop application in daily production use. Earlier career in computer-vision research and university teaching.

TECHNICAL SKILLS

Core, daily production: JavaScript, MeteorJS, BlazeJS, Node.js, MongoDB, REST APIs, Cypress, Git / GitHub

Shipped with: React.js, Electron.js, SQLite, D3.js, IndexedDB, Stripe API, Chargebee API, Arabic RTL interfaces

Familiar: React Native, TypeScript, Next.js, PostgreSQL / SQL, HTML5, CSS3, Linux

Earlier / research: C++ with OpenCV, C# with EmguCV, VHDL

PROFESSIONAL EXPERIENCE

Full-Stack JavaScript Developer | PerfectSoft, Sfax, Tunisia — Jun 2022 – Present

Commit Action (app.commitaction.com) — business accountability coaching platform whose team has helped 10,000+ entrepreneurs and executives

- Designed and implemented a calendar integration system connecting Google Calendar, Outlook, and iCloud with backend scheduling logic.
- Built Stripe payment and Chargebee subscription workflows supporting billing and product monetization.
- Built and maintain a Cypress end-to-end test suite covering critical checkout and onboarding flows, reducing regressions before releases.
- Developed client-facing features including onboarding flows, interactive UI components, file uploads, and D3.js data visualizations.
- Improved application responsiveness and offline reliability through IndexedDB-based local data handling.
- Building a React Native Android MVP (in progress) for internal product validation.

Bell Family Company (bellfamilycompany.com) — family services network, legacy platform modernization

- Contributing to an ongoing migration from a legacy PHP platform to a modern stack (MeteorJS/React application plus Next.js website), progressively modernizing UI and key workflows in production.
- Built the Stripe and Chargebee billing and subscription integration from scratch for the new platform.

Scientific Researcher | Metrology and Energy Systems Laboratory, Monastir — Sep 2014 – Dec 2021

- Developed computer-vision and image-processing algorithms in C++ / OpenCV and C# / EmguCV, including heuristic pattern analysis across a 1,250-image dataset and 3D jet-axis reconstruction from 2D images.

University Teacher | National Engineering School of Monastir — Sep 2016 – Jun 2020

- Taught electronics, image processing, peripheral interfacing, and VHDL to 300+ engineering students.

SELECTED PROJECT

Quran Association Manager | Source-available, in production use — Aug 2025 – Present

github.com/SalimElheni1/quran-association-manager — Electron, React, SQLite

- Offline-first desktop application for administering a Quranic association branch, replacing paper-based workflows with modules for students, teachers, classes, attendance, finances, and cross-module reporting.
- Built with AI coding agents, as product owner and technical lead: requirements, plans, technical decisions, and release testing.
- Delivered role-based access control, full Arabic RTL support, secure local SQLite storage, PDF/Word/Excel export, and backups.
- Defined the financial module rules: automatic fees, numbered receipts, legal cash limits, and fixed-format reports.
- In production 17 days after the first commit; in daily use since, managing about 300 students and 15 teachers.

EDUCATION & TRAINING

McKinsey.org Forward Program | McKinsey.org, online — Jun 2026

Full Stack JS Web Developer Bootcamp | CrocoCoder & CORP (AHK Tunisia, with GIZ), remote — Aug – Dec 2021

Master's in Micro and Nanoelectronics | Faculty of Science, Monastir — 2011 – 2013

Bachelor's (Licence) in Physics–Electronics | Faculty of Science, Monastir — 2008 – 2011

LANGUAGES

Arabic (native) | French (professional working proficiency) | English (professional working proficiency)
